

LOTUS MULTISPECIALITY HOSPITAL

Plot 14, Banjara Hills Road No. 3, Hyderabad, Telangana - 500034

DISCHARGE SUMMARY

Patient Name	Rajesh Kumar	Age / Sex	46 / Male
UHID No.	LMH-2025-33021	IPD No.	IP-11029
Admission Date	12-Jun-2025	Discharge Date	18-Jun-2025
Consultant	Dr. S. Venkataraman, General Surgeon	Ward	Private Room, 3rd Floor

Final Diagnosis:

Acute Appendicitis (ICD-10: K35.80)

Procedure Performed:

Laparoscopic Appendectomy performed on 12-Jun-2025 under General Anaesthesia. Intra-operative findings: inflamed appendix with localized peritonitis, no perforation. Procedure uneventful.

Course in Hospital:

Patient presented to the Emergency Department with severe right iliac fossa pain, fever and vomiting of 1 day duration. Investigations (USG Abdomen, CBC, CRP) were suggestive of Acute Appendicitis. Patient was taken up for emergency Laparoscopic Appendectomy on the day of admission. Post-operative period was uneventful. Patient was monitored in ICU for 24 hours as a precautionary measure and shifted to the ward thereafter. Patient tolerated oral feeds well and wound healed satisfactorily.

Condition at Discharge:

Stable, afebrile, wound clean and dry, tolerating oral diet.

Discharge Medications:

Tab. Amoxiclav 625mg - twice daily x 5 days; Tab. Pantoprazole 40mg - once daily x 5 days; Tab. Paracetamol 650mg - SOS for pain.

Follow-up Advice:

Review in Surgery OPD after 7 days for suture removal. Avoid heavy lifting for 4 weeks.
